

# a Revolution In Unified Communications

## Technical Specifications

MessageNet Systems products are designed to be compatible with a wide range of existing communications equipment. In fact, one of the greatest benefits of working with MessageNet Systems is that you don't need to create a dedicated system for your emergency and alert communications. MessageNet software works with any PC or work station that can run a browser, and a wide range of pagers, telephones, overhead paging systems, visual message boards, PDAs, and other communication devices.

## System Specifications

Server: PC with a minimum 500 MB of RAM and 80 gig hard drive; minimum processor speed of 2.0 GHz  
 Operating System: Linux  
 Web Browser/User Interface: Netscape or Internet Explorer  
 PA/Intercom Connectivity: Any standard telephone system  
 Electronic Signboard Connectivity (Wired) : CAT5 based 1- to 32-port sign controllers  
 Electronic Signboard Connectivity (Wireless): 802.11b/g and 2.4 Ghz Wireless modems

## Paging Specifications

Server supports multiple Serial Port TAP, and TNPP  
 Paging protocols supported: TAP, SNPP, TNPP, WaveWare

## Service and Support

We at MessageNet Systems are serious about providing our customers with the very best in timely, expert service and support to help ensure their emergency and alert communications systems are always functioning at optimum levels. We're also available to consult with you and help you create the system that meets your needs precisely. Please contact us via e-mail, or call us at 317-566-1677 and tell us how we can help.

## System Capabilities Graph

We have provided a quick reference guide to the system's capabilities listed by each product's individual features. MessageNet Express MX also supports wireless distress/panic buttons, window/door open detectors, and smoke/motion detectors. And one of the unique advantages of the MessageNet products are that they are scalable, so you can start with your specific needs now, and later upgrade your system to add functionality.
